

# IH<sup>®</sup> C113 & C123 CYLINDER SLEEVES

There are two ways to identify the cylinder sleeves for the C113 and C123 engines.

1) By the outside diameter of the sleeve - at the lower pilot area - which is either 3.311" or 3.436".

2) Identify the sleeve by the length of it. The cylinder sleeve with the 3.311" outside diameter measures 6.78" in length, while the sleeve with 3.436" outside diameter measures 7.0625" in length.

6.78"

7.0625"
